LET'S BUILD A BETTER FUTURE

FRONT ENTRY DOORS / **AD** series

Comfort is just a step away

Front entry doors, aren't they one of the most important parts of our home? They protect us from the cold, from the rain or the burglars, to mention just these examples. Doors also keeps us away from street noise. But how do you make the right choice, and buy a door that will meet our expectations and serve us for years?

An issue that requires careful consideration before the purchase is the heat transfer coefficient (U). The lower its value, the more heat will stay with us inside. **Aluprof offers panelled doors with the U_D coefficient of 0.44 W/(m²K).**

When choosing our door, let's not forget to check out their water resistance. It's the water resistance of the door that will keep the driving rain outside in times of strong winds and heavy rain. Water resistance of the front entry door is rated from 3A to 9A. The higher the class, the better the door protects our home. **Aluprof offers panelled doors rated 7A.**

Infill panels are included in door leaves based on the MB-70, MB-79N, MB-86N & MB-104 Passive system, and come in a variety of colours and structures. The elements can be milled, decorated with applications or made of insulated glass. **Panelled doors can be fabricated very large and high – up to 1.40 m (W) and almost 2.60 m (H).** If, therefore, we dream of an impressive front entrance, this will be the perfect choice. But above all, the door should fit to the style of your home. If our interiors are the traditional ones, we should opt for a leaf with glass panels or wooden-like veneer. Lovers of modern interior can choose among RAL colours, think shade of graphite.

Let's take some time and choose a door with which we will create a beautiful entrance that will enchant our guests and will make us feel like we were in a safe haven.

MB-104 Passive

U_D from 0.44 W/m²K

Aluprof's panel door uses thermally insulated aluminium profile system – MB-104 Passive is the most technologically advanced door system offered by Aluprof. The leaf profile can be combined with special infills, aligned with the surface of the frame. The system is dedicated to passive and energy-efficient buildings

Technical details:

Frame depth	95 mm
Leaf depth	95 mm
Infill panel thickness	44 - 95 mm
Maximum dimensions of the leaf	(H×L) L up to 1400 mm, H up to 2600 mm

Technical parameters:

Air permeability	Class 3, EN 12207
Water tightness	Class E1200 (1200 Pa), EN 12208
Wind load resistance	Class C4/B4, EN 12210
Thermal insulation	U_D from 0.44 W/m²K
Burglary-resistance	RC2

Aesthetically pleasing, decorative panels are available in various designs and RAL colours

Expansion profiles and door leaf panels

Design variants: SI, SI+ and AERO

Central gaskets around the leaf and the frame to seal, cover, and increase the thermal insulation of the door

High density polyurethane foam (PUR) with high thermal performance

95 mm wide threshold the frame and threshold are the same width, providing a desirable flush finish

MB-86N

U_D from 0.64 W/m²K

Aluprof's panel doors use thermally insulated aluminium profile system – MB-86 – which, just like the MB-104 Passive system, is dedicated to energy-efficient and passive building. The leaf profile can be combined with special infills, aligned with the surface of the frame.

Technical details:

|	
Frame depth	77 mm
Leaf depth	77 mm
Infill panel thickness	44 - 77 mm
Maximum dimensions of the leaf	(H×L) L up to 1400 mm, H up to 2600 mm

Technical parameters:

Air permeability	Class 3, EN 12207
Water tightness	Class E900 (900 Pa), EN 12208
Wind load resistance	Class C5/B5, EN 12210
Thermal insulation	U_D from 0.64 W/m²K
Burglary-resistance	RC2

Aesthetically pleasing, decorative panels are available in various designs and RAL colours

Expansion profiles and door leaf panels

They come in four versions: ST, SI, SI+ and AERO for a very good thermal performance
Excellent thermal insulation thanks to the polyurethane foam (PUR)

Rigid and durable aluminium profiles permit the fabrication of large-dimensioned doors

Specially designed weather strips provide high water tightness and low air permeability, bringing both a comfort and a potential for cost savings

STAY SAFE AND WARM AT HOME

MB-79N

U_D from 0,7 W/m²K

Aluprof's panel door uses popular, thermally insulated aluminium profile system – MB-79N ST, MB-79N SI and MB-79N SI+. The leaf profile can be combined with special infills, aligned with the surface of the frame.

Technical details:

Frame depth	70 mm
Leaf depth	70 mm
Infill panel thickness	44 -70 mm
Maximum dimensions of the leaf	(H×L) L up to 1400 mm, H up to 2600 mm

Technical parameters:

Air permeability	Class 3, EN 12207
Water tightness	Class E900 (900 Pa), EN 12208
Wind load resistance	Class C5/B5, EN 12210
Thermal insulation	U_D from 0.7 W/m²K
Burglary-resistance	RC2

Elegant decorative panels, available in may different patterns and RAL colours and wood effect finishes

Expansion profiles

They come in three versions:
MB-79N ST, MB-79N SI and MB-79N SI+,
for a very good thermal performance

XPS polyurethane foam ensures an excellent thermal insulation

Specially designed weather strips provide high water tightness and low air permeability, bringing both a comfort and a potential for cost savings

MB-70

U_D from 0.9 W/m²K

The structure of panel doors is based on the popular thermally broken aluminium sections MB-70 and MB-70HI which complete the range of energy-efficient doors in the Aluprof portfolio. Similarly to other panel door system the leaf profile is designed for coupling with special infill panels that can be installed flush with the door f rame plane.

Technical details:

Frame depth	70 mm
Leaf depth	70 mm
Infill panel thickness	44 -70 mm
Maximum dimensions of the leaf	(H×L) L up to 1200 mm, H up to 2400 mm

Technical parameters:

Air permeability	Klasa 4, EN 12207
Water tightness	Klasa 7A (300 Pa), EN 12208
Wind load resistance	Klasa C5/B5, EN 12210
Thermal insulation	U_D from 0.9 W/m²K
Burglary-resistance	RC2

Elegant decorative panels, available in may different patterns and RAL colours and wood effect finishes

Expansion profiles

Two design variants: MB-70 and MB-70HI for a very good thermal performance

XPS extruded polystyrene with enhanced thermal insulation

Specially designed weather strips provide high water tightness and low air permeability, bringing both a comfort and a potential for cost savings

BASIC

Insert panels

- Double glazing units, U_g coefficient of U_g 0.5 W/m²K or of 0.7 W/m²K
- 44 to 72 mm thick panel
- Thermal transmittance for MB-70HI doors U_D from 1.3 W/m²K, for MB-79N doors U_D from 1.0 W/m²K, for MB-86N doors U_D from 0.8 W/m²K and for MB-104 doors U_D from 0.63 W/m²K
- Four versions: ST, HI, SI, SI+ and Aero
CLASSIC

Aligned on one side

- Triple glazing units, U_g coefficient of U_g 0.5 W/m²K or of 0.7 W/m²K
- 44 to 85 mm thick panel
- Thermal transmittance for MB-70HI doors U_D from 1.1 W/m²K, for MB-79N doors U_D from 0.9 W/m²K, for MB-86N doors U_D from 0.67 W/m²K and for MB-104 doors U_D from 0.48 W/m²K
- Four versions: ST, HI, SI, SI+ and Aero

EXCLUSIVE

Aligned on both sides

- Triple glazing units, U_g coefficient of U_g 0.5 W/m²K or of 0.7 W/m²K
- 70 mm thick panel (MB-70 and MB-79N), 77 mm (MB-86N) and 95 mm (MB-104 Passive)
- Thermal transmittance for MB-70HI doors U_D from 0.9 W/m²K, for MB-79N doors U_D from 0.7 W/m²K, for MB-86N doors U_D from 0.64 W/m²K and for MB-104 doors U_D from 0.44 W/m²K
- Four versions: ST, HI, SI, SI+ and Aero
All available models can be inserted into the profiles or glued on one or both sides.

Aluprof offers a wide range of glass with motif, glass made of transparent or ornamental glass in its most popular models.

All door models come in variants with sidelight and toplight.

Variant 1: Sandblasted glass (motif)
Variant 2: Transparent glass
Variant 3: Ornamental glass
Variant 4: Safety glass

Sidelights and fixed lights include triple glazing units with warm glass spacers.
Sidelights (fixed glazing) can be placed either on one or on both sides of the door assembly.
Maximum sidelight width: 1400 mm

Extra ornaments (optional):
"Master-Point"
"Chinchilla"
"Satinata"
"Master-Ligne"
"Master-Carre"
"Mirrastar" (mirror effect)
"Antisol" (semi-transparent mirror effect)
